

Recycling Progress Report

December 2014

This monthly progress report is brought to you by the Refresh Recycling pilot program. As part of this program, you can track how much your building has recycled each month, get tips on how to recycle more to improve your stats, and compare your building to others in the area. Let's work together as a community to recycle more.

This month, residents of Belle Arts earn a:

Gold Recycling Star!

You are ahead of the pack when it comes to reducing your environmental footprint and conserving resources through recycling. Keep it up!

Last month your building recycled:

8,484 lbs of recyclable materials

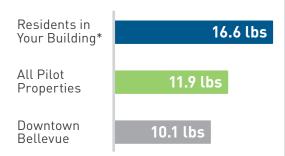

= which saved enough energy to power =

NONSTOP FOR 143 YEARS

RECYCLING REQUIRES LESS ENERGY THAN USING RAW MATERIALS

How your weekly recycling compares to your neighbors:

^{*}Average lbs per unit per week

Recycling History

During the duration of the pilot program (September 2014 - February 2015)

ARE YOU RECYCLING ALL EMPTY PLASTIC BOTTLES?

Chances are, probably not. Just 3 out of every 10 plastic bottles get recycled.* Plastic bottles of all sizes, shapes, and colors can be recycled – whether they contained water, soda, juice, milk, detergent, household cleaners, personal care products. Simply empty, give them a quick rinse, and recycle.

Plastic bottles are recycled into new bottles or turned into other plastic products such as pipes, lumber, decking, pallets, buckets, and crates. Recycling one single plastic bottle conserves enough energy to power a television long enough to watch your favorite show.
